

WINE PARIS & VINEXPO PARIS TO BE SPONSORED BY GUALA CLOSURES FOR THE THIRD CONSECUTIVE YEAR

From 13 to 15 February 2023, Paris is hosting one of the most important and anticipated events in the wine world, with more than 3,000 exhibitors from 52 countries. As official sponsor of the event, Guala Closures will be presenting its range of screw cap closures designed for the wine segment, and a selection of luxury products for the spirits market.

Milan, 10 February 2023 - Guala Closures Group, world leader in the production of closures for spirits, wines, water, beverages and oil, will display its latest innovations at the Wine Paris & Vinexpo Paris 2023 exhibition, at the Paris Expo Porte de Versailles.

For the third consecutive year, Guala Closures will be the official partner and exclusive sponsor from the packaging industry at the first international event of the year dedicated to the global wine and spirits industry. This is an unmissable three-day event for producers and wine lovers, where over 3,000 exhibitors from 52 countries will gather in the French capital to present their flagship products and most exclusive bottlings. The program will include over one hundred tastings, masterclasses, and debates with industry experts.

The renewal of the sponsorship underlines the Group's commitment to support France's wine and spirits producers, a strategic market undergoing a strong development by Guala Closures.

Within its **stand F018** located in the **international pavilion 5.2**, Guala Closures will present a wide variety of screw closures for the wine segment. In particular, the latest news relating to the different processes, anti-tampering systems and sustainable closures will be exhibited. Screw caps, available in a wide range of colours, sizes, shapes, and materials, are in fact particularly important for the wine industry. Thanks to their characteristics, they preserve quality, freshness and full flavor of the product and avoid potential contamination by TCA, the fungus that causes the so-called "corked taste."

In addition, there will be a selection of high-end products designed for the spirits segment, which has been recently strengthened also by the acquisition of Labrenta, a company of excellence in the production of *luxury* closures.
